Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Restriction to one of the following invention is required under 35 U.S.C. 121.

Group I: claim(s) 26-55, drawn to a method for identifying organic non-peptide compounds useful in the treatment of cancer.

Group II: claim 56, drawn to a method of evaluating whether an organic compound can promote a wide-type activity in a mutant form of a mammali protein of the p. 53 family.

The several inventions above are independent and distinct, each from the other, as they have acquired a separate status in the art cancer as a separate subject matter for inventive effect and require independent searches. It is noted that the a reference to one Group I method would not be a reference to Group II method under 35 U.S.C. 103. Therefore, restriction for examination purposes is proper.

Applicant is required to make a provisional election even though this requirement is traversed.
